PROFILE

Innovative and results-driven **Software Engineer** specializing in **Web Design and Machine Learning**. Passionate about creating sleek, responsive websites and leveraging AI/ML to build intelligent solutions. Adept at problem-solving, full-stack development, and integrating AI models into web applications. Proven track record in software development, teaching, and managing large-scale projects.

SKILLS & TECHNOLOGIES

Web Design & Development

- HTML, CSS, JavaScript (React.js, Vue.js)
- UI/UX Design (Figma, Adobe XD)
- WordPress, Webflow
- Frontend & Backend Development (Node.js, Django, Flask)
- API Development & Integration

Machine Learning & AI

- Python (TensorFlow, PyTorch, Scikit-learn)

- Data Analysis & Visualization (Pandas, Matplotlib)
- Computer Vision & NLP
- AI Model Deployment (Flask, FastAPI, Streamlit)

Other Technical Skills

- Database Management (MySQL, PostgreSQL, Firebase)
- Version Control (Git, GitHub)
- Cloud Computing (AWS, Google Cloud, Azure)
- Agile & Scrum Methodologies

EXPERIENCE

Founder & Lead Instructor – Cobot Kids (2024 – Present)

- Established a coding school to teach web development, AI, and robotics to students aged 5–22.
- Designed an interactive curriculum focusing on Scratch, HTML, CSS, and Python.
- Partnered with schools to integrate coding into their curriculum.
- Developed a school management system to track attendance, finances, and resources.

Software Engineer & Web Developer – Freelance (2023 – Present)

- Developed modern, responsive websites and e-commerce platforms.
- Built AI-powered web applications for automation and data-driven decision-making.
- Integrated ML models into web interfaces for predictive analytics.

ICT Tutor & Robotics Trainer – Strathmore University, Smart Brains (2022 – 2024)

- Taught robotics, Scratch, Python, and web development to over 500 students.
- Conducted hands-on training sessions, enhancing students' practical skills.
- Designed course materials and structured learning modules.

EDUCATION

🎓 **Diploma in Software Engineering** (*mt Kenya university, 2023*)

📖 **Machine Learning Specialization** (*Kenya institute of software engineering – 2023*)

PROJECTS

1. Smart Inventory & Sales Tracker

- Built a web application to track inventory, sales, and expenses for a computer shop.
- Features include profit calculation, automated reporting, and user-friendly UI.
- Technologies: Django, React.js, PostgreSQL, AWS

2. AI-Powered Chatbot for E-Learning

- Developed an AI chatbot to assist students with coding and ML concepts.
- Integrated NLP and knowledge-based AI models for adaptive learning.
- Technologies: Python, Flask, TensorFlow, React.js

3. School Management System (Cobot Kids)

- Automated school operations, including attendance, fee tracking, and scheduling.
- Designed a dynamic dashboard for real-time insights.
- Technologies: Node.js, MongoDB, Vue.js

CERTIFICATIONS

✓ Google Data Analytics Certification (*Google, 2024*)

✓ AWS Certified Cloud Practitioner (*AWS, 2023*)

✓ Responsive Web Design (*FreeCodeCamp, 2023*)

✓ Python for Machine Learning (*Coursera, 2022*)

ACHIEVEMENTS

- 🏆 **Taught & Managed Over 500 Students** in coding and robotics programs.
- 🏆 **Founded & Scaled a Tech Business** integrating **AI into** education.
- 🏆 **Developed an AI-Powered Web Platform** for real-time decision-making.
